# INSTALLATION INSTRUCTIONS

1. Measure and cut the required lengths.
2. Clean all the ends to be joined
3. Assemble the pipe. Use a coupling to join the fiberglass to other piping materials. Use a compatible, waterproof sealant on the fiberglass joints.
4. Secure the pipe in place to eliminate the possibility of movement when covering with concrete.
3. Excavate a 2" cavity at each joint to allow the concrete to encircle the joint.

# MATERIALS

Pipe, adapters and couplings are manufactured from pure, clean fiberglass mat, impregnated with polyester resin and hardener. Mat binder is silicone oxide. It is resistant to most acids, alkalies and other chemicals. This material is inorganic and will not rot or mildew. It is non-toxic and 100% asbestos free.
